

ECBA™ / CBAP® / CCBA® Study Group

Pop Quiz – BABOK® v3, Chapter 3

ANSWER SHEET

Study Group Participant Name: _____

Date: October 23, 2019

Facilitator: Nancy Beatson, CBAP

1. Jennifer is a BA who was recently hired to elicit requirements for a new reporting solution. She is new to the organization and has begun analyzing the stakeholders who will be directly or indirectly impacted by the solution. Which of the following aspects of the stakeholders should she analyze?
 - a) Names, roles and attitudes
 - b) Attitudes, level of influence and roles
 - c) Supervisors, authority over business analysis activities and attitudes
 - d) Salaries, attitudes and management perspectives

2. Which of the following is a qualitative measure that can be used to assess business analysis work?
 - a) The number of review cycles needed for the BRD
 - b) How many resources were available to complete the requirements elicitation tasks
 - c) The number of business objectives met by the solution
 - d) Whether the BA had the skills and/or knowledge to perform the assigned work

3. Which of the following is not a technique used for planning BA governance?
 - a) Item tracking
 - b) Mind mapping
 - c) Document analysis
 - d) Organization modelling

4. Ben, the BA, is working with a group of stakeholders who have never worked with a BA before. They are uncertain about the business analysis activities that Ben is performing and why they are being performed, particularly where it involves their participation. They think that some of the activities are a waste of time. To address their concerns, Ben decided to conduct performance analysis to ensure that his BA activities were continuing to deliver value to those stakeholders. Which BA core concept is Ben addressing?
 - a) Risk
 - b) Value
 - c) Stakeholders
 - d) Context

5. If a BA decides on a business analysis approach where solution iterations are defined to arrive at a best solution, what type of business analysis approach is this?
 - a) Cyclical

- b) Analytical
 - c) Adaptive
 - d) Predictive
6. What are the inputs to the Plan Business Analysis Governance task?
- a) Business Analysis Approach and Stakeholder Engagement Approach
 - b) Business Analysis Approach and Conduct Elicitation
 - c) Communicate Business Analysis Information and Stakeholder Engagement Approach
 - d) Assess Risks and Business Analysis Approach
7. Which of the following is not a common requirements attribute?
- a) Absolute reference
 - b) Preference
 - c) Priority
 - d) Complexity
8. Brenda is a BA on a project that does releases every 3 months. She needs to plan the BA approach for the upcoming release. Numerous enhancements are requested by different stakeholders within the organization. There are also some requirements that are necessary as a result of regulatory changes impacting the organization. With so many “asks” being made, Brenda realizes that the specific BA approach to be used could be dependent on which requests are actually going to be fulfilled in the next release. Brenda has advised the Director of the program to review the requests for validity and to see if justification can be made for allocating resources to each request. Which artifact is she advising the Director to assess?
- a) Requirements prioritization
 - b) Root cause analysis
 - c) Business case
 - d) Financial analysis
9. Preethi, is a BA working in a highly-regulated government department. She is working on a project that involves the replacement of 15 legacy reporting systems with a single system. There are many stakeholder groups that she needs to consult with in order to make sure their requirements are elicited and documented. Patricia, the project sponsor, has stated that the new single system, the existing and new users of the new system, and the processes by which the different user groups will use the system must be well defined before the solution is even built. What type of business analysis approach should Preethi employ?
- a) Recursive
 - b) Comprehensive
 - c) Predictive
 - d) Adaptive
10. In order for requirements to be reused, they must be:
- a) Subjective and ambiguous
 - b) Clearly named and defined
 - c) Stored in a repository that prevents access by other business analysts
 - d) Written in text

Answer Key

Question Number	Answer	BABOK® Section	BABOK® Page
1	B	3.2.4.1	33-34
2	D	3.5.4.2	49
3	B	3.3.6	41
4	B	3.0 (BACCM™)	22
5	C	3.1.4.1	26
6	A	3.3.3	37
7	B	3.4.4.6	45-46
8	C	3.1.6	29
9	C	3.1.4.1	26
10	B	3.4.4.4	45
